

Anatomy & Physiology

Elective Science Course for **Juniors & Seniors** – **Full year** – **College Prep-** **BSU Concurrent Enrollment**

“For those who are fascinated by the human body”

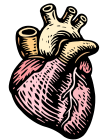

Focus: Physiology of the **human body** and how it functions as well as the anatomy or parts of the body.

Who: Interested in the health care field or would just like to understand how their bodies function are encouraged to take this course.

Recommended for students who have taken biology and received a B or better OR are taking Biology currently. Many student take this concurrently with another science classes. Very helpful for AP Bio.

This course has several labs and projects that focus on you, so you understand your body better. *Some dissections will be required.*

For information see Mrs. Schmidt in room 214
